Buprenorphine: An Alternative Treatment for Opioid

Buprenorphine is an opioid medication approved by the Food and Drug Administration (FDA) for treatment of opioid dependence and for acute and chronic pain. Buprenorphine has a "ceiling effect" on respiration; that is, increasingly higher doses do not affect breathing in the same way that other opioids do.

Buprenorphine: Everything You Need to Know - chcf.org

Buprenorphine has been available as a prescription opioid in Canada since 2008. Suboxone® by RB Pharmaceuticals in combination with naloxone in a sublingual tablet. In Canada, it is indicated for maintenance treatment of opioid dependence. Buprenorphine treatment provides an important alternative to methadone maintenance treatment in Canada.

BUPRENORPHINE Buprenorphine for the Treatment of Opioid

Buprenorphine is not indicated for acute pain in outpatient setting, except when a waived buprenorphine prescriber is treating pain in a patient whose primary diagnosis is the disease of addiction. Step 6 Include the following required documentation in the medical record:

Opioid and Buprenorphine - msv.org

Buprenorphine is a long-acting (24-36 hours) opioid that - produces less respiratory depression at high doses than other narcotic treatment drugs. However, severe respiratory depression can occur when buprenorphine is combined with other central nervous system depressants, especially benzodiazepines.

BUPRENORPHINE (Trade Names: Buprenex®, Suboxone®, Subutex®)

Clinical Guidelines for the Use of Buprenorphine in the Treatment of Opioid Addiction. The Guidelines address a number of topic areas related to this goal, including the physiology and pharmacology of opioids, opioid addiction, and treatment with buprenorphine; the screening and assessment of opioid addiction problems;

Clinical Guidelines for the Use of Buprenorphine in the

Approved for clinical use in October 2002 by the Food and Drug Administration (FDA), buprenorphine represents the latest advance in medication-assisted treatment (MAT). Medications such as buprenorphine, in combination with counseling and behavioral therapies, provide a whole-patient approach to the treatment of opioid dependency.

Buprenorphine | SAMHSA - Substance Abuse and Mental Health

Butrans is a buprenorphine transdermal patch indicated for the management of pain requiring around-the-clock, long-term opioid treatment that is not adequately controlled with alternatives. Dosages of 5 mcg/hr, 7.5 mcg/hr, 10 mcg/hr, 15 mcg/hr, and 20 mcg/hr are available, but only the 5 mcg/hr dose is recommended for opioid-naïve patients.

A Brief Review of Buprenorphine Products

alternative presented in easily understandable and comprehensive language. • 2009 Training Participant ... participants receiving short-term buprenorphine treatment is . significantly more likely to complete detoxification episodes and to be free of illicit opioids at that time. Participants also

Buprenorphine Treatment: Training for Multidisciplinary

(2.3) i. For patients dependent on methadone or long-acting opioid products, induction onto sublingual buprenorphine monotherapy is recommended on Days 1 and 2 of treatment. (2.3) i.
