An audit is a systematic and independent examination of books, accounts, statutory records, documents and vouchers of an organization to ascertain how far the financial statements as well as non-financial disclosures present a true and fair view of the concern. It also attempts to ensure that the books of accounts are properly maintained by the concern as required by law.

In Brief. Data analytic software has become a ubiquitous tool for both auditors and forensic accountants. Most practices, however, still confine themselves to the use of traditional structure data analysis tools with limited visual capabilities, which leaves out swathes of relevant information and limits options in its presentation.
