BOOKSHELF Contemporary Catalysis: Science, Technology, and Applications Encompassing an integrated approach to the various aspects of catalysis, this textbook covers heterogeneous, homogeneous, organo, bio-, and computational catalysis, as well as reaction and reactor engineering on an advanced level.

Contemporary Catalysis: Science, Technology, and

Contemporary Catalysis Science Technology and Applications Encompassing an integrated approach to the various aspects of catalysis covering heterogeneous homogeneous organo bio and computational catalysis as well as reaction and reactor engineering on. Title: Contemporary Catalysis: Science, Technology, and Applications ...

Contemporary Catalysis: Science, Technology, and Applications

Because the field of catalysis is one where current activity is enormous and because various topics in catalysis reach a degree of maturity at different points in time, it is not expedient to impose a preconceived order ed structure upon Catalysis: Science and Technology with each volume devoted to a particular subject area.

CATALYSIS - Science and Technology - Springer

Contents/Summary. Organometallic chemistry, surface science, biochemistry, nanoscience, transport phenomena and kinetics, reactor and reaction engineering are presented, spanning from the underlying science to industrial applications. Several important case studies on industrial applications are given.

This Science and Technology Roadmap on Catalysis for Europe is the result of the efforts within the European Cluster on Catalysis and a public consultancy of all stakeholders. A major theme of interest was to promote the central role of catalysis as key technology to a sustainable future.

SCIENCE AND TECHNOLOGY ROADMAP ON CATALYSIS FOR EUROPE

Co-sponsored by the ACS Division of Catalysis Science & Technology and the ACS Publications journal ACS Catalysis, the Lectureship honors the contributions of an individual or a collaborative team for groundbreaking research that strengthens connections between catalysis subdisciplines and has a profound impact on catalysis as a whole. The 2014 ACS Catalysis Lectureship for the Advancement of Catalytic Science will be presented at the Fall 2014 ACS National Meeting in San Francisco, California.

Catalysis science promises to revolutionize how new catalysts and catalytic processes are designed to enable the continued introduction of new energy resources and economical and sustainable synthesis of chemicals and energy carriers, including novel approaches to chemical energy storage.
