

geometry and convexity a pdf

In finance, bond convexity is a measure of the non-linear relationship of bond prices to changes in interest rates, the second derivative of the price of the bond with respect to interest rates (duration is the first derivative). In general, the higher the duration, the more sensitive the bond price is to the change in interest rates. Bond convexity is one of the most basic and widely used ...

Bond convexity - Wikipedia

In convex geometry, a convex set is a subset of an affine space that is closed under convex combinations. More specifically, in a Euclidean space, a convex region is a region where, for every pair of points within the region, every point on the straight line segment that joins the pair of points is also within the region. For example, a solid cube is a convex set, but anything that is hollow ...

The Journal of Mathematical Analysis and Applications presents papers that treat mathematical analysis and its numerous applications. The journal emphasizes articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, and engineering, particularly those that stress analytical aspects and novel problems and their solutions.

Journal of Mathematical Analysis and Applications

A tool for matching point clouds or other kinds of data. Useful for making grids from point clouds.

tant donn e une partie quelconque A de l'espace ambiant E (espace affine ou contexte plus g n ral), il existe au moins un sous-ensemble convexe de E contenant A, savoir E lui-m me ; ceci autorise   consid rer l'intersection de tous les sous-ensembles convexes de E contenant A. On l'appelle l'enveloppe convexe de A et on la note co(A) [4] ou Conv(A).

Professor Frances Kirwan Oxford University (United Kingdom) Frances Kirwan is the Savilian Professor of Geometry at the Mathematical Institute in Oxford. Her research lies in the area of algebraic geometry (mostly over the field of complex numbers) and its links with other parts of geometry, especially symplectic (and hyperk hler) geometry.
