Research comprises "creative and systematic work undertaken to increase the stock of knowledge, including knowledge of humans, culture and society, and the use of this stock of knowledge to devise new applications." It is used to establish or confirm facts, reaffirm the results of previous work, solve new or existing problems, support theorems, or develop new theories.

1. Introduction. The integration of environmental and social aspects with economic considerations, known as the triple-bottom-line (TBL) dimensions of organizational sustainability (Elkington, 1998, Elkington, 2004), has continuously gained relevance for managerial decision making in general and for supply chain management (SCM) (Carter & Rogers, 2008) and operations management (Drake and ...

Quantitative models for sustainable supply chain

The first stage of the process is to Identify potential information risks. Several factors or information sources feed-in to the Identify step, including: Vulnerabilities are the inherent weaknesses within our facilities, technologies, processes (including information risk management itself!), people and relationships, some of which are not even recognized as such;

1 "Forthcoming in the Journal of Performance Measurement" Measuring Investment Skill Using The Effective Information Coefficient

Measuring Investment Skill Using The Effective Information

Level of measurement or scale of measure is a classification that describes the nature of information within the values assigned to variables. Psychologist Stanley Smith Stevens developed the best-known classification with four levels, or scales, of measurement: nominal, ordinal, interval, and ratio. This framework of distinguishing levels of measurement originated in psychology and is widely ...
