**PERCEIVED STRESS SCALE** by Sheldon Cohen The Perceived Stress Scale (PSS) is the most widely used psychological instrument for measuring the perception of stress. It is a measure of the degree to which situations in one's life are appraised as stressful. Items were designed to tap how unpredictable, uncontrollable, and overloaded respondents find their lives.

With reference to the Job Demands-Control Model, we empirically examine the effect of auditors' work stress on audit quality using a sample of Chinese A-share listed companies and their signature auditors from 2009 to 2013.

## **How does auditors' work stress affect audit quality**

Physiological or biological stress is an organism's response to a stressor such as an environmental condition. Stress is the body's method of reacting to a condition such as a threat, challenge or physical and psychological barrier. Stimuli that alter an organism's environment are responded to by multiple systems in the body.

INTRODUCTION. Heat stress causes serious physiological dysfunction that may result in a decline in animal performance (Gous & Morris, 2005). High temperatures have been proposed to be responsible for stimulating free radical production both in the animal body and animal products (Yahav, 2009). In summer, high environmental temperatures can be detrimental to laying hens, not only because of it ...
