1. Introduction. Vitamin C is a crucial nutrient which cannot be synthesized in human body due to the deficiency of L-gulono-gamma-lactone oxidase, the enzyme catalyzing the terminal step in l-ascorbic acid biosynthesis []. Because vitamin C deficiency may result in the potentially fatal disease scurvy and human body has only limited storage capacity for the water-soluble vitamin C, a regular ...

John Hattie developed a way of synthesizing various influences in different meta-analyses according to their effect size (Cohen's d). In his ground-breaking study "Visible Learning" he ranked 138 influences that are related to learning outcomes from very positive effects to very negative effects. Hattie found that the average effect size of all the interventions he studied was 0.40.

Nursing is a profession within the health care sector focused on the care of individuals, families, and communities so they may attain, maintain, or recover optimal health and quality of life. Nurses may be differentiated from other health care providers by their approach to patient care, training, and scope of practice. Nurses practice in many specialties with differing levels of prescription ...

For New Orleans, the news on average student outcomes is quite positive by just about any measure. The reforms seem to have moved the average student up by 0.2 to 0.4 standard deviations and boosted rates of high school graduation and college entry.

Good News for New Orleans: Early evidence shows reforms

Ayurveda Research Papers (CCA Student papers) The selected papers published on our website have been written by students of the California College of Ayurveda as a part of their required work toward graduation.

Ayurveda Research Papers (CCA Student papers)

Hopefully, as the framework is now maturing, more such papers will appear. Extent of this site's coverage of the Threshold Concept Framework This bibliography initially reflected the interests of the compiler but, over a decade, has been massively extended to cover most disciplines and topics in which there are published papers on the threshold concept framework.

Introduction. Embryonic stem (ES) cells, which are derived from the inner cell mass of mammalian blastocysts, have the ability to grow indefinitely while maintaining pluripotency and the ability to differentiate into cells of all three germ layers (Evans and Kaufman, 1981, Martin, 1981). Human ES cells might be used to treat a host of diseases, such as Parkinson's disease, spinal cord injury ...

The mechanism that governs tissue regeneration following severe damage to the colonic epithelium remains poorly understood. Jensen and colleagues show that the colonic epithelium undergoes a profound reprogramming into a more primitive state with fetal-like properties. Moreover, they demonstrate that YAP and TAZ operate as essential mechano-sensors during tissue reprogramming.
