In commerce, supply-chain management (SCM), the management of the flow of goods and services, involves the movement and storage of raw materials, of work-in-process inventory, and of finished goods from point of origin to point of consumption. Interconnected or interlinked networks, channels and node businesses combine in the provision of products and services required by end customers in a ...

Supply. A supply is the procurement, distribution, maintenance while in storage and salvage of supplies, including the determination of kind and quantity of supplies. The producer phase of a military supply extends from determination of procurement schedules to acceptance of finished supplies by the military services. The consumer phase of a military supply extends from receipt of finished ...

Supply Chain Management (SCM), in recent years, has received increased attention from both academicians and managers. Managing a supply chain implies the integrated management of a network of entities, that begins with the suppliers' suppliers and ends with the customers' customers, for the production of products and services to the end consumers.
